PARTH SHAH

Los Angeles, CA | pshah89@depaul.edu | 872-325-5086 | LinkedIn | ArtStation

3D Artist with professional experience creating models, textured assets, and animated content for commercial projects, alongside collaborative academic production. Versatile across hard-surface, character, and environment modeling; sculpting; retopology and UVs; PBR texturing and look development; scene lighting; rendering; rigging; animation; and simulation. Maya-centered workflow complemented by Blender, ZBrush, Substance 3D Painter and Redshift. Curious, collaborative, and motivated to grow across disciplines through feedback and hands-on production.

EDUCATION

DePaul University *Chicago, IL*
M.A. in 3D Animation Nov 2026

Mumbai University *Mumbai, India*
B.A. in Mass Media May 2022 | GPA: 9.02/10

PROJECTS

3D Animated Short Film Collaborative Production
• Worked in a five-person team to create a 3-minute, 25-second animated short from concept through final render, contributing across modeling, rigging, texturing, lighting, animation, set design, and props.

Character Animation Studies | Performance & Timing
• Created short character-animation studies focused on body mechanics, acting, and timing, including a get-up-after-punch sequence and an audio-driven character monologue.

Marble Music | Dynamics & Cloth Simulation
• Built a stylized 3D sequence integrating Bullet rigid-body dynamics and cloth flag simulation, developing the scene through animation and final rendering.

Ancient Temple | Environment Design & Look Development
• Created an environment inspired by traditional Indian architecture; modeled in Maya, developed sculptural details in ZBrush, textured in Substance 3D Painter, and rendered in Redshift.

Vampire Character | Character Modeling
• Sculpted a stylized character in ZBrush, designed clothing in Marvelous Designer, and completed retopology and UV layout in Maya for a production-ready asset.

Vintage Props | Hard-Surface Modeling & Texturing
• Modeled and UV-mapped an alarm clock and hand drill in Maya; developed worn, stylized materials in Substance 3D Painter and rendered in Redshift.

EXPERIENCE

Student Volunteer, SIGGRAPH 2026, Los Angeles *July 2026*
• Supported conference operations and engaged with professionals across animation, VFX, games, and computer graphics.

Vice President, DePaul ACM SIGGRAPH Student Chapter, Chicago, IL *May 2025 – June 2026*
• Organized animation workshops, mentorships, and industry sessions; increased student attendance by 30% through targeted outreach and coordinated weekly chapter activities.

3D Artist, Nutcracker Digital, Mumbai, India *Apr 2021 – Jul 2024*
• Developed 3D models, textured assets, and animated visual content for commercial projects, managing workflows from concept development to final rendering.
• Collaborated with creative teams to optimize 3D assets, lighting, materials, and animation sequences for high-quality digital production.

3D Modeler, Unicorn Technos, Mumbai, India *Dec 2020 – Mar 2021*
• Created 3D models, materials, and rendered assets for promotional content and brand presentations; supported scene setup, asset refinement, and 3D visualization.

SKILLS

3D: Hard-surface, character & environment modeling; sculpting; retopology; UV mapping; PBR texturing/look development; scene assembly; lighting/rendering; rigging; character & non-character animation; rigid-body & cloth simulation.
Software: Autodesk Maya, Blender, ZBrush, Substance 3D Painter, Marvelous Designer, Unreal Engine 5, Redshift, Arnold, Adobe After Effects, Photoshop, Illustrator, Premiere Pro.
